## 2008 Hemp Fabrics, Blends, & Notions

Dear Eco Buyer,

Welcome to *Hemp & More*. These materials are from a supplier that has been in the hemp business since 1993. Find 100% hemp in addition to blends with organic or conventional cotton, lycra, flax, ramie, silk, and recycled polyester. Also find bamboo woven fleece, as well as hemp twine, yarn, and webbing. Home textiles continuously expand. You may inquire about periodic discounts and feel free to request digital images with descriptive details. A minimal fee may apply to post fabric swatches; simply review options and ask.

Included are wash, pre-shrink and softening services with a minimum of 100 yards. That is a hot wash, placed in a tumble dryer, and then re-framed on a roll. Tubular knit fabrics may also be slit open upon request.

Find most fabrics in their natural state, yet there is a nice selection of colors. Dye services require a minimum of 200 yards. Due to the porous nature of the fiber, hemp is more water absorbent and will dye with color retention better than any other fabric, including cotton.

This porous nature allows hemp to breathe so that it is cool in warm weather. Furthermore, air which is trapped in the fibers is warmed by the body, making hemp garments naturally warm in cooler weather. Hemp fiber is one of the strongest and most durable of all natural textile fibers. The more hemp is used, the softer it gets. Hemp doesn't wear out. It wears in. Hemp is also naturally resistant to mold and ultraviolet light. That spells perfect ocean resort wear. Hemp blended with other fibers easily incorporates the desirable qualities of both textiles.

Get hip and buy hemp!
